EDUCATION

University of Westminster — **London, England**

BSc (Hons). in Computer Science — *Expected Graduation, May 2028*

Informatic Institute of Technology — **Colombo 6, Sri Lanka**

BSc (Hons). in Computer Science — *Sep 2023 – May 2024*

GCE Advanced Level — Physical Science — **Ana/National College**

Combined Mathematics: B · Physics: B · Chemistry: C — 2021 - 2023

WORK EXPERIENCE

Junior Full-Stack Developer — Trade-Flow — *2025 – Present*

Smart Trading Assistant Platform · Production Product

- Designed and shipped a full-stack trading journal and analytics platform end-to-end, owning the React/Vite frontend, Node.js/Express REST API backend, and PostgreSQL database layer on Supabase.
- Implemented JWT authentication, third-party payment processing, and role-based access control, then deployed to production using Vercel (frontend) and Render (backend) with zero-downtime releases.
- Transformed raw financial data into interactive P&L dashboards and performance visualisations using Recharts, enabling real-time insight into trade distributions and win rates.

Stack: React, Vite, Node.js, Express.js, Supabase, PostgreSQL, JWT, Recharts, Vercel, Render

PROJECTS

Production-Grade API & Development System — *2026 – Present*

- Architected a reusable Node.js/Express API template with a strict 4-layer architecture, multi-stage Docker builds (Alpine, ~50 MB), and Docker Compose environments for dev and production with health checks and resource limits.
- Automated 3 GitHub Actions CI/CD pipelines — ESLint/Prettier checks, Jest + SuperTest integration tests with coverage upload, and multi-arch Docker image build and push to Docker Hub — triggered on every push and PR.
- Integrated enterprise-grade security: Arcjet role-tiered rate limiting and bot detection, Helmet HTTP headers, httpOnly JWT cookie auth, bcrypt hashing, and Zod schema validation on all inputs.

Stack: Node.js, Express.js, PostgreSQL, Drizzle ORM, Docker, Docker Compose, GitHub Actions, CI/CD, YAML, JWT, Zod, Jest, TypeScript, Linux

REQRUITA (SDGP) – Anti-Cheating Interview Platform — *2025 – Present*

- Built a tamper-resistant Electron desktop app with OS-level browser lockdown and live WebRTC video proctoring streamed to a Next.js admin dashboard for real-time candidate monitoring.
- Developed a scalable Node.js/Express REST API backed by MongoDB, consumed by both the Electron client and the web admin panel, supporting session recording and candidate evaluation workflows.

Stack: React, Next.js, Electron, Node.js, Express.js, MongoDB, WebRTC, WebSockets, TypeScript

Macro-Economic Sentiment Tracker *2026 – Present*

- Engineered a 4-tier automated data pipeline: a headless Python/Playwright scraper feeds a Node.js/Express API backed by PostgreSQL (Supabase), which powers a Next.js + Tailwind CSS dashboard deployed to Vercel.
- Calculates a composite live market sentiment score from high-impact macroeconomic indicators, visualising real-time global market mood for traders.

Stack: Python, Playwright, Node.js, Express.js, PostgreSQL, Supabase, Next.js, TypeScript, Tailwind CSS, Vercel

Bank Loan Risk & Approval Prediction System *2026 – Present*

- Built an end-to-end ML pipeline predicting loan approvals and estimating loan limits, achieving 97% recall on KNN after hyperparameter tuning with GridSearchCV and class stratification on imbalanced data.
- Benchmarked Logistic Regression, Naïve Bayes, KNN, and Decision Tree models using Scikit-Learn; feature-engineered datasets with Pandas and NumPy; visualised distributions with Plotly Express and Matplotlib.

Stack: Python, Scikit-Learn, Pandas, NumPy, Plotly Express, Matplotlib, Jupyter Notebook

TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · Tailwind CSS · Vite · Recharts · ElectronJS
Backend	Node.js · Express.js · REST API · JWT Auth · Zod · Playwright · Drizzle ORM
Databases	PostgreSQL · MongoDB · Supabase · MS SQL Server
DevOps & Cloud	Docker · Kubernetes (k8s) · GitHub Actions · CI/CD · YAML · Linux · Vercel · Render · Jest · Git
Languages	JavaScript · Python · Java · C# · SQL · HTML · CSS · TypeScript

CERTIFICATIONS & AWARDS

Problem Solving — International Hackathon · University of Westminster	*Feb 2026*
DevOps Foundations · LinkedIn Learning	*2026*
Learning Docker · LinkedIn Learning	*2026*
Node.js Essential Training · LinkedIn Learning	*Jan 2026*
React.js Essential Training · LinkedIn Learning	*Jan 2026*
Java Object-Oriented Programming · LinkedIn Learning	*Nov 2025*
